

Altimune Announces Oral Presentation of Pemvidutide Clinical Data at Upcoming American Diabetes Association Scientific Sessions June 6, 2022

May 31, 2022

GAITHERSBURG, Md., May 31, 2022 -- Altimune, Inc. (Nasdaq: ALT), a clinical-stage biopharmaceutical company, today announced that the results of the Company's recently completed Phase 1 clinical trial of pemvidutide, an investigational GLP-1/glucagon dual receptor agonist in development for the treatment of obesity and NASH, will be presented in an oral presentation at the 82nd American Diabetes Association (ADA) Scientific Sessions, to be held in New Orleans, LA on June 3-7, 2022.

Details for the oral presentation are as follows:

Title:	Pemvidutide (ALT-801), a Balanced (1:1) GLP-1/Glucagon Dual Receptor Agonist, Induces Rapid and Marked Weight Loss without the Need for Dose Titration in People with Overweight/Obesity
Date/Time:	Monday, June 6, 2022 at 4:30 pm CDT

About Altimune

Altimune is a clinical-stage biopharmaceutical company focused on the development of novel peptide-based therapeutics for the treatment of obesity and liver diseases. The company's lead product candidate, pemvidutide, is a GLP-1/glucagon dual receptor agonist that is being developed for the treatment of obesity and NASH. In addition, Altimune is developing HepTcell™, an immunotherapeutic designed to achieve a functional cure for chronic hepatitis B. For more information, please visit www.altimmune.com.
